

# SNAIGĒ

## WINE COOLER WD35SM

A solid and spacious Snaigé WNE cooler colored to mimic aged wood, this is ideal for the storage and display of wine. Its construction and design will compliment any wine shop or restaurant and could even be used within your own home.

Build a style for a Wine cooler that matches your brand philosophy, interior or even a personality. We are ready to offer from simple ordinary branding solutions to sophisticated and extraordinary ones. We can fulfil our customer's branding ideas, as well as to offer our branding or product personalization solutions.

**Ecological and environmentally friendly**

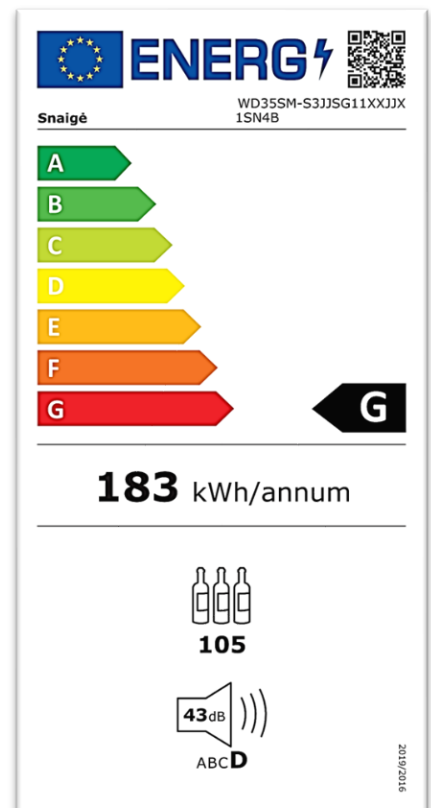

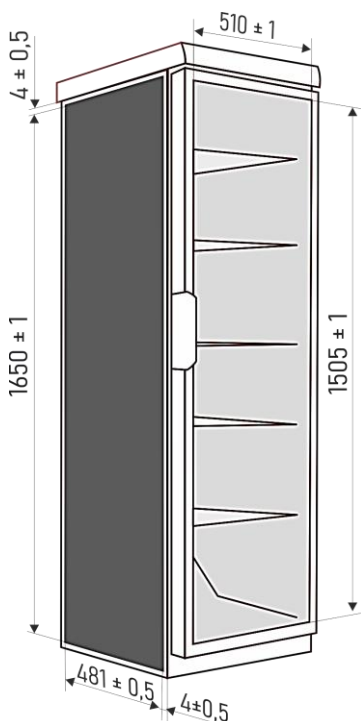

Snaigé WNE coolers are manufactured using only non-harmful, non-ozone-depleting and non-greenhouse-effect refrigerating and insulating materials. Natural resource-saving materials and electricity from renewable energy sources are used in the refrigerator manufacturing process.

## SPECIFICATION

Freestanding wine cooler	WD35SM-S3JJSG1 1XXJJX1SN4B
Gross capacity	350 l
Net capacity	330 l
Capacity in bottles 0,75 l	105 pc.
Ambient temperature	From +16 to +32 °C
Relative humidity	70 %
Products temperature range (Min / Max)	From +4 to +14
Airborne acoustical noise emissions	43 dB(A) re1 pW
External dimensions (H x W x D)	1730 x 600 x 600 mm
Energy class	G
	172.0
Annual energy consumption	169 kWh/year
Cooling system	Static
Refrigerant	R600a
Thermostat type	Electromechanical
Defrosting	Automatic
Door opens to the right	Nb
Maximum load per shelf	50 kg

Branding scheme (in mm)

## FEATURES

### Door with the packet of tempered glass with film

Glass of wine cooler are covered with a special film which doesn't transmit ultraviolet rays which negatively impact on wine quality.

### Efficient LED lighting

The integrated LED lamp, perfectly illuminates the inside of the fridge. LED lamps are more durable, resistant to vibration and changes of temperature, compared to conventional lamps. They use up to 80 % less electricity, do not radiate UV or infrared rays and do not contain mercury.

### Carbon filter

A small, unobtrusive but very effective carbon filter is built into the back of inside wall. It absorbs extraneous odors and ensures proper 50-80% humidity level inside the wine cooler.

### Wooden shelves

The SNAIGĖ wine cooler has high-quality handmade wooden shelves. Made of ash or oak, it has a pleasant woody characteristic smell. Easy to pull out, conveniently modeled - for convenient storage of wine.

### Shelf for displaying wine

The bottom shelf can be placed on the top and switched at 45 ° angle for wine exposition.

## OPTIONAL FEATURES

- Branding
- Additional shelves
- Additional bottom shelf for displaying wine
- Analogue termometre

WINE  
TEMPERATURE

Zone designation	Position of the thermostat (when ambient temperature +25 °C)				
	1	2	3	4	5
1 zone	12 - 14	12 - 14	12 - 14	10 - 12	8 - 10
2 zone	10 - 12	10 - 12	9 - 11	8 - 10	6 - 8
3 zone	8 - 10	8 - 10	8 - 10	6 - 8	4 - 6
4 zone	8 - 10	8 - 10	6 - 8	4 - 6	4 - 6
5 zone	8 - 10	8 - 10	4 - 6	2 - 4	2 - 4
6 zone	6 - 8	6 - 8	4 - 6	2 - 4	1 - 3

The temperature in the wine cooler is controlled using the thermostat – thermoregulator – turning it to one side or the other. The temperature indication in digits is shown beside the thermostat knob. When the door is closed, the temperature setting can be seen on the thermostat indicator display.
